EDUCATION

Non-degree Program

Technische Universität Darmstadt, Darmstadt, Germany

Exchange student in Mechanical Engineering and Computer Science

9/2015-10/2016

Fully funded by China Scholarship Council

Overall of GPA: 2.55/1.0 (good)

Core Courses: Robot Learning Integrated Project, Statistical Machine Learning

Degree Program

Nanjing University of Aeronautics and Astronautics, Nanjing, P.R.China

B.Eng in Aircraft Manufacturing Engineering

9/2012-6/2017

Thesis: A Robot arm playing badminton simulated in SL-Lab

Overall of GPA: 3.6/5.0 (86/100)

Core Courses: Advanced Mathematics, Theoretical Mechanics, Electrical and Electronic Technology, Mechanical Principle and Design, Control System

WORK EXPERIENCES

HRG, HIT Robot Group, Kunshan, Jiangsu, P.R.China

Algorithm Engineer, ROS(Robot Operating System) Branch

7/2017-8/2018

- Github Page: <https://github.com/hitrobotgroup>
- Promoted the performance and robustness of autonomous guided vehicles (AGV) by modifying or writing ROS navigation stack, specifically the global and local planners.
- Integrated and implemented existed open-source Lidar-SLAM to accommodate indoor localization and navigation.
- Managed the public github account of ROS developers belonged to our group.
- Participated in several leading fairs for Automation and Robotics as the exhibitor, Auomatica in Munich Germany and CeMAT in Shanghai China, not only demonstrating AGVs in motion but also delivering English presentations to visitors.
- Responsible for certain implementations of AGV projects in the factories and warehouses of clients, such as Harman Kardou(Suzhou) and Innolux Corporation (Shanghai).

PROJECT EXPERIENCES

Autonomous System Lab, Technische Universität Darmstadt, Darmstadt, Germany

Robot Learning: Integrated Project Part I

4/2016-10/2016

- Participated in an Integrated Project of Autonomous System Lab in the Robotics Branch of Computer Science, majorly programming in C.
- By utilizing kalman filters, the dynamic trajectories of a flying shuttlecock and feasible hitting position were predicted. And by implementing the minimum jerk controller by adapting the Transpose Jacobian method, the simulated movement of manipulator was smoothened.
- With the help of the Simulation Lab developed by Prof. Stefan Schaal from USC, we completed an autonomous simulated methodology for a robot arm to play badminton in Simulation Lab.

Supervisor: Boris Belousov and Jan Peters.

ACADEMIC SKILLS

Programming— C/C++, Matlab, Julia; Script(Python, Shell); Markup(L^AT_EX, XML); Softwares(ROS, Ubuntu, AutoCAD)

Languages— English: TOEFL.IBT(99), GRE(317)

SERVICE

Student Affairs Service Center, NUA, Nanjing, P.R.China

Volunteer, Director of Service Branch

9/2012-9/2013

- Worked as a volunteer for one year in a students' organization to help freshmen with enrollment and academic affairs.
- Participated in the recruitment as the director of service branch. Completed a new version of Service Guide for training the newcomers.

GRANTS AND AWARDS

- 2nd Scholarship, Merit Students, NUA AY 2012-2014
- China Scholarship Council (CSC) Exchange Student Scholarship, NUA 5/2015
- TU-Darmstadt Semester Scholarship, Deutscher Akademischer Austausch Dienst(DAAD) 11/2015
- Excellent Volunteer, Student Affairs Service Center, NUA 10/2013
